Education

University of California, Berkeley

B.Sc., Electrical Engineering and Computer Sciences (*GPA: 3.90/4.00*)

Berkeley, CA

Expected May 2022

Monta Vista High School

(*GPA: 4.00/4.00*)

Cupertino, CA

Aug. 2014 - Jun. 2018

Related Coursework

**In Progress Fall 2020*

Operating Systems*

Probability & Random Processes*

Linear Algebra / Multivariable Calculus

Signals & Systems

Machine Learning

Algorithms

Programming Languages: Python (Keras, TensorFlow, Numpy), Java, C

Experience

STEP Intern

May 2020 - Present

Google

Virtual Internship

- Worked under Google Search Infrastructure and Google Assistant teams.
- Built a collaborative code editor as a full-stack engineer. Designed user interface wireframes and mocks. Constructed file system using Google Cloud Datastore and Java servlets. Created a versioning system that used operational transformation and the Firebase Realtime Database to revert to previous document states.
- Created code linting guide, which was linked on a reference document for 700+ interns and Google engineers.

IoT Engineering Intern

May 2019 - Aug. 2019

Intel Corporation

Chandler, AZ

- Developed and published brain tumor segmentation demo on the Intel DevCloud. Used U-Net (convolutional neural network for biomedical applications) architecture for inferencing on MRI brain scans and identifying brain tumor matter. Benchmarked inferencing on edge hardware, including CPUs, VPUs, and FPGAs. Worked with Keras, TensorFlow, and OpenVINO deep learning models in FP32 and FP16 precision formats.
- Scripted in Excel Visual Basic and Power BI DAX for product demand tracking and forecasting.

Projects

Chief Technology Officer

May 2020 - Present

ASUC Student Government

Berkeley, CA

- Secured funding pipelines, cultivated cross-organizational projects and partnerships, and managed student-facing products such as Berkeleytime, Berkeley Mobile, and Beehive.
- Led the Office of the Chief Technology Officer and managed 40+ student developers.

Project Manager

Sep. 2018 - Present

Berkeleytime

Berkeley, CA

- Led product and engineering vision for course planning site visited by 26,000+ monthly users.
- Previously worked as frontend engineer, visualizing grade distribution and enrollment trend data. Built mobile components for responsive viewing.
- Utilized web development libraries such as ReactJS, Bootstrap, Redux, and Recharts.

Awards

EECS Honors Program, Business Management

UC Berkeley EECS Dept.

Jan. 2020

U.C. Berkeley Leadership Award

Cal Alumni Association

2018, 2019

1st Internationally, Automotive Services Marketing

DECA Competition

Apr. 2018
